

Title:	Machine Learning and IoT for Computer Vision
Topics of Interest:	The topics should be in the scope of the conference: • Machine learning and tracking of motion-based object Data • Fusion of Machine Learning and computer vision for the Prediction • Machine learning, IoT, and computer vision Applications • Computer-Based Detection and Counter-Measure Techniques • Medical imaging (skin lesion detection, cancer detection, enhancement techniques for MRI images, and automated disease prediction)
Session Chair	1. Dr. Velliangiri Sarveshwaran SRM Institute of Science and Technology, Kattankulathur Campus, India Email: velliangs@srmsit.edu.in 2. Dr Karthikeyan Periyasamy National Cheng Chung University, Taiwan Email: karthi@ccu.edu.tw
